

Sensor Basin Faucet (Cold Only)(110V) 5790-S0-81CP

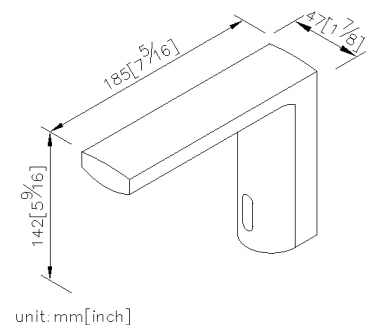

INTRODUCTION:

As the ancient Chinese proverb said, square implies honest, round implies intelligent and the combination of both means wisdom. This great wisdom is the accumulation of Chinese culture for thousands of years, the principal of behaviors and embodiment of Eastern philosophy. Square and round of Arch 2 Basin Sensor Faucet present on the spout design to display the perfect interpretation of ancient wisdom and modern style.

DESCRIPTION:

- 1.Safety Guard: Valve off if water flowing over 60sec.
- 2.Automatically detect environment, adjust sensor, and have anti-interference function.
- 3.Inner filter prevent the blockage of sensor valve.
- 4.Power supply specifications: input voltage 100~240V AC, 50Hz, 0.2A. Output voltage 6V DC, 600mA
- 5.Powered by the power supply, automatically switches to battery power when power is off.
- 6.Flush Mode: Water start flowing if valid sensing around 0.5sec~1.0sec
- 7.Low power prompt: Red indicator light will be flashed for prompting battery replacement.
- 8.The faucet valve can stand the pressure from 0.5 to 6 kgf/cm²
- 9.Brass with Chrome plated meets ASTM-SC2 standard; 5 years guarantee.

Certification:

Fixing Kits:

- 1.
