

Concealed Pressure Balanced Valve 6874-9Y-80CP

INTRODUCTION:

The bath valve combined traditional double valves as one device. Its chromplated surface has a smooth touching texture, which also decorates interior well. The valve is simple to operate, and could be equipped with many kinds of outlet. Applying MARUWA cermeic disc on catridge, the valve is highly antiwear and anticrack for at least 10 years. The material toughness makes sure accessories precisely assembled, preventing water leakage.

DESCRIPTION:

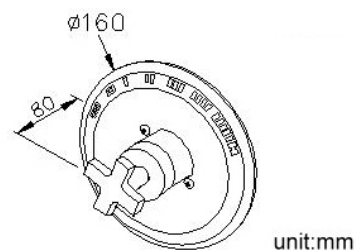

Pressure balanced valve
