

Countertop Soap Dispenser 6880-26-80CP

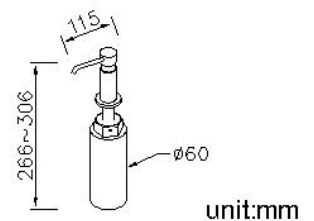

INTRODUCTION:

The cylindrical shape is commonly used in Chinese and Western architectural design, often as the shape of beams and columns, giving a stable and reliable impression. This series of products are integrated into a cylindrical shape, with delicate chrome plating, to create classic bathroom equipment. The countertop soap dispenser separates the bottle and the dispenser head, and it is easy to use as a faucet, presenting a free and natural bathroom space.
